

COMETS
CNRS Ethics Committee

OPINION n°2006-13

« GENDER EQUALITY »

Approved at plenary session of 7 november 2006

SUMMARY

At its plenary meeting on 7 November, COMETS expressed its regret that the recent appointments to the Board of Directors had not resulted in a balanced representation of men and women on the Board.

Elisabeth Dubois-Violette, former chair of the Scientific Board (who during her term of office actively participated in the work of COMETS), has since been lobbying the Minister of Research and members of parliament to ensure that such a situation does not happen again. Through some of its members, COMETS has followed this action and made a small contribution to its progress towards concrete measures.
